PROFESSIONAL SUMMARY

A versatile IT specialist who works end-to-end across Windows, Linux, and macOS environments, with core strength in system architecture, hardware, and IT infrastructure, complemented by entry-to-intermediate cybersecurity capability. Graduate of the Information Security Technology program at Cappadocia University, with a hands-on profile built on standing up isolated test labs, applying network segmentation and virtualization, and developing security-focused Python tooling. Technical foundation reinforced by Red Team (CRTOM), Cisco (IT Essentials 7, Networking Essentials), and BTK Academy certifications, together with strong analytical thinking, fast learning, and cross-platform proficiency. Ready to deliver value quickly in enterprise IT operations, system/endpoint security, and infrastructure management.

CORE COMPETENCIES

Systems & Infrastructure: Windows / Linux / macOS administration, virtualization (VMware, VirtualBox, UTM), network segmentation, isolated lab deployment, system hardening, cross-platform configuration

Hardware & IT Operations: Hardware installation & troubleshooting (IT Essentials 7), endpoint management, technical support, IT asset management, technical documentation

Networking & Security: TCP/IP, network protocols, firewall, IDS/IPS, network security configuration (Networking Essentials), access control

Cybersecurity (Entry–Intermediate): Penetration testing methodology, vulnerability assessment, Kali Linux, Red Team fundamentals (CRTOM), incident response, threat intelligence basics

Software & Automation: Python (entry–intermediate), scripting & automation, C# and JavaScript (basic), SQL / NoSQL fundamentals, Git & GitHub version control

Cryptography & Information Security: Applied cryptography basics, hashing algorithms (MD5/SHA family), secure software development principles, information systems security management

EXPERIENCE & PROJECTS

Isolated Kali Linux Penetration Testing Lab 2025–2026
Built a penetration testing lab fully isolated from production using network segmentation and secure virtualization, establishing a safe workspace for controlled vulnerability analysis.

- Executed vulnerability scanning, exploit development, and reporting end-to-end, making both offensive and defensive scenarios reproducible within a single isolated environment.

Red Team Operations Simulation (CRTOM) 2026
Designed attack simulations on real-world scenarios and developed defensive response plans as part of the Red Team Leaders CRTOM certification, which was completed successfully.

Vulnerability Scanning Tool (GUIN) 2025–2026
Developed a zero-external-dependency tool on the Python standard library that used 50 parallel threads to significantly reduce network discovery and port-scanning time.

- Consolidated port scanning, ICMP/TCP ping, and network discovery into a single tool with both a colorized terminal and a Tkinter-based GUI version. github.com/NidaSu0/Guvenlik-Tarayici

Password Security Analysis Tool 2025–2026
Built real-time password strength analysis based on Shannon entropy plus GPU brute-force time estimation, automating detection of weak passwords.

- Integrated MD5/SHA-1/SHA-256/SHA-512 hash comparison and a secure password generator with JSON-based history logging. github.com/NidaSu0/sifre-analiz

OptiStock — Inventory & CRM Management System (Capstone) 2025–2026
Developed a Flet (Flutter-based) desktop application unifying product inventory, customer management, and sales operations on a local SQLite database, earning a perfect 100/100 grade.

- Delivered a standalone CRM solution for small businesses featuring daily revenue charting and local data persistence. github.com/NidaSu0/Optistock

EDUCATION

Associate Degree, Information Security Technology I, GPA: 3.28 / 4.00 — Nevşehir, Türkiye Aug 2024 – Jun 2026
Cappadocia University — Cappadocia Vocational School

- 4th-semester GPA: 3.62 — highest performance in the graduating term; Capstone project (OptiStock): perfect 100/100.
- Key courses: Cyber Attack & Defense, Network Security, Secure Software Development, Applied Cryptography, Information Systems Security Management I–II, Mobile Security, Python Programming, NoSQL Applications, AI Applications.

CERTIFICATIONS

- Certified Red Team Operations Mgmt (CRTOM) — Red Team Leaders — Feb 2026

- IT Essentials 7 — Cisco NetAcad / Cappadocia Univ. — Jan 2026
- Networking Essentials — Cisco NetAcad / Cappadocia Univ. — Jul 2025
- Python Essentials 1 & 2 — Cisco NetAcad / Cappadocia Univ. — Jun 2026
- JavaScript Essentials 1 — Cisco NetAcad / Cappadocia Univ. — May 2026
- Intro to Cybersecurity / Incident Response / Python for Cybersecurity — BTK Academy — Jan 2026
- Ethical Hacking Training — Udemy (Atıl Samancıoğlu) — In Progress | Cybersecurity & Information Security — Udemy (Burak Sürme) — Jun 2026

LANGUAGES

- Turkish — Native
- English — A2–B1 (actively improving; technical-terminology focused)
- German — Beginner (ongoing coursework)

REFERENCE

Lecturer Hatice ET — Program Head, Information Security Technology Program, Cappadocia University Cappadocia Vocational School.

The full reference letter (original, Turkish) with signature appears on the final pages of this document.

İlgili Makama,

Kapadokya Üniversitesi Kapadokya Meslek Yüksekokulu Bilişim Güvenliği Teknolojisi Programı öğrencisi **Nida Subaşı** hakkında referans vermekten memnuniyet duymaktayım.

Nida Subaşı, öğrenimi süresince bilişim teknolojileri ve siber güvenlik alanında kapsamlı bir eğitim almış, mesleki bilgi ve becerilerini sürekli geliştirmeye özen göstermiş başarılı bir öğrencidir. Programımız kapsamında; **Bilgi Güvenliğine Giriş, Ağ ve Sistem Güvenliği, Siber Savunma ve Savunma Yöntemleri, Temel Kriptoloji, Güvenli Yazılım Geliştirme, Bilişim Sistemleri Güvenliği Yönetimi, Siber Tehdit İstihbaratı, Python ile Temel Programlama, Web Script Dilleri, Web ve Mobil Programlama, Veri Analizi, Yapay Zekâ Uygulamaları ve Proje Yönetimi** gibi alan derslerini başarıyla tamamlamıştır.

Bu eğitimler sayesinde bilgi güvenliği prensipleri, ağ güvenliği, kriptografik yöntemler, güvenli yazılım geliştirme süreçleri, siber savunma yaklaşımları, tehdit analizi, programlama ve veri analitiği konularında teorik bilgi edinmiş; uygulamalı dersler aracılığıyla bu bilgileri pratiğe dönüştürme fırsatı bulmuştur. Özellikle analitik düşünme, problem çözme, teknik araştırma yapabilme ve yeni teknolojilere uyum sağlama konularında yetkinlik göstermiştir.

Akademik süreçlerde sorumluluk sahibi, disiplinli ve öğrenmeye açık bir tutum sergileyen Nida Subaşı, ekip çalışmalarında uyumlu çalışabilen, görevlerini zamanında yerine getiren ve mesleki gelişimine önem veren bir öğrencidir. Sahip olduğu teknik altyapı ve çalışma disiplini sayesinde bilişim güvenliği ve bilgi teknolojileri alanlarında başarılı çalışmalar gerçekleştirebileceğine inanmaktayım.

Bu nedenle Nida Subaşı'nı eğitim, staj, değişim programı veya kariyer fırsatları için gönül rahatlığıyla tavsiye ediyor; başvuracağı kurum veya kuruluşlara değer katacağına inanıyorum.

Saygılarımla,

Öğr. Gör. Hatice ET

June 23, 2026

To Whom It May Concern,

I am pleased to provide a reference for **Nida Subaşı**, a student of the Information Security Technology Program at Cappadocia University, Cappadocia Vocational School.

Throughout her studies, Nida Subaşı has received comprehensive training in information technologies and cybersecurity and has consistently sought to develop her professional knowledge and skills. Within our program, she has successfully completed field courses including **Introduction to Information Security, Network and System Security, Cyber Defense and Defense Methods, Applied Cryptography, Secure Software Development, Information Systems Security Management, Cyber Threat Intelligence, Fundamental Programming with Python, Web Scripting Languages, Web and Mobile Programming, Data Analysis, Artificial Intelligence Applications, and Project Management.**

Through these courses she has gained theoretical knowledge in information security principles, network security, cryptographic methods, secure software development, cyber defense approaches, threat analysis, programming, and data analytics, and has had the opportunity to put this knowledge into practice through applied coursework. She has demonstrated particular competence in analytical thinking, problem solving, technical research, and adapting to new technologies.

Displaying a responsible, disciplined, and learning-oriented attitude, Nida Subaşı works well in team settings, completes her tasks on time, and values her professional development. Owing to her technical background and work discipline, I believe she is capable of carrying out successful work in the fields of information security and information technologies.

For this reason, I gladly recommend Nida Subaşı for education, internship, exchange programs, or career opportunities, and I believe she will add value to any institution to which she applies.

Respectfully,

Lecturer Hatice ET
Program Head
